Frequently Asked Questions (FAQ)

Q1: How often should I backwash my Doughboy Silica Plus filter?

A1: The frequency of backwashing depends on several factors, including pool usage, the amount of debris, and the type of pool surface. As a general rule, backwashing is typically needed every 7-14 days. However, consistently monitor the pressure gauge; a significant increase indicates the need for backwashing. Refer to your Doughboy Silica Plus manual for specific guidance.

Q2: What type of silica sand should I use for my Doughboy Silica Plus filter?

A2: Always use silica sand specifically designed for swimming pool filters. The Doughboy Silica Plus manual will specify the correct grade and size of sand. Using the wrong type of sand can damage the filter and compromise its performance.

Q3: How do I know when it's time to replace the silica sand?
